

Welcome to our

Ocean Maritime Training Institute (OMTI)

Ocean Maritime Training Institute (OMTI) is the rapid growing training institution in the maritime industry of Bangladesh. OMTI offers a wide-range of STCW compliant courses for all grades of Certificate of Competency. Practical based training as the driving force of the current and future training needs.

Established in 2013, Ocean Maritime Training Institute has rapidly achieved its position as the leading private maritime training institute by being true to the mandate of its founders: to provide our clients and students with the highest quality professional training available based on a foundation of strong principles. This exceptional system has been designed to fulfill all of the requirements of international bodies and is custom tailored for a goal to achieve.

- Safe ship operation and protection of the marine environment.
- To be able to meet, educate and fulfill the requirements as per standards set by International Maritime Organization.
- Communication and understanding their needs and protecting their assets.
- Uninterrupted ship operations and zero losses.
- Client satisfaction through open and trusted.

Over the years, OMTI has evolved alongside the rapidly changing regulatory environment. As we grew to understand how dramatically training requirements were changing, we have expanded our training facilities to include various practical training courses. In line with our policy of continuous improvement and our motto "**Excellence through effective Training**" OMTI has set up the practical training on PST, FPFF & PSC&RB courses. Very soon we will set up simulator based training; Bridge Simulator, Engine Room Simulator, GMDSS, ROC, ARPA and ECDIS courses.

OMTI takes pride in being innovative and understands the value of individual instruction and ensures to provide it. These customized training programs are to meet the changing demands of ship owners as per their ISM & ISO training schemes. Only by training a crew to excel in every way and for every situation we can give ship owners peace of mind in regards to safety, environmental protection, maintenance and prevention of accidents, incidents and losses.
